-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

1. Claims 3, 4 and 6-22 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Oshima . Ohsima discloses elements as set forth in the instant claims for the reasons set forth in paragraph 7 of the first action filed 3-9-05. Elements with two photosensitive layers are disclosed by the disclosure of “ at least one photosensitive layer “ in Ohsima . The disclosure of at least one photosensitive layer would at least make obvious elements with two photosensitive layers in Ohsima. Applicants' argument that the binders of formula I of the instant claims are not disclosed in Ohsima is unconvincing since Ohsima discloses the same formula I binders as in the instant claims for photosensitive layers which would be located in all of the photosensitive layers, i.e. first and second photosensitive layers. The first layer of the instant claims includes photosensitive layers.

2. The prior art cited by applicants has been considered.
